

NORTHSHORE TECHNICAL COLLEGE

EMERGING GREEN TECHNOLOGY

FOR THE CONSTRUCTION SECTOR

You will be trained to be a
Green Building Analyst and / or RESNET Rater

FREE TUITION

Based on income and residency in St. Tammany Parish

Placement Assistance Available

Classes Offered

- *Building Science
- *Energy Efficiency
- *Weatherization
- *Building Analysis
- *RESNET
- *Employability Skills

A RESNET Certified home energy professional is trained to pinpoint the areas of your home where energy is being wasted and used inefficiently. More importantly, they prioritize cost-effective improvement opportunities that pay financial dividends every time your utility bill arrives. They use the Energy Star Rating System that is also utilized by the US Weatherization Program.

Class Starts

Monday, August 23, 2010

BPI certified professionals are in demand now more than ever before. In fact, many state-run energy efficiency and weatherization assistance programs demand BPI credentials. With the unprecedented funding available under the American Recovery and Reinvestment Act (ARRA), BPI certified professionals have a key role to play in helping these programs expand.
